Screw-in and weld-in pockets

- for thermocouples and RTD temperature probes
- thermometers can be replaced without draining the system
- pockets in different materials
- operating pressure up to 450 bar
- available with acceptance certificate 3.1 (machined from solid)

Screw-in and weld-in pockets are used for installing thermocouples and RTD temperature probes whenever replacement without draining the system and/or pressure resistance are required.

The dimensions specified for **EL** refer to the fitting lengths of the thermometers; the dimension **L** indicates the fitting length of the pocket.

The pressure resistance is dependent on the temperature and is specified for each item. The maximum pressure that can be sealed on the thread depends on the installation conditions and may be lower. The pressure specifications contain no safety margin for additional loading through flow velocity.

Calculations of the permitted pressure under given conditions of flow, temperature and medium can be provided as a service to the user.

Acceptance test certificate:

3.1, can be requested when ordering.

Further sheaths, data sheet 902440

Technical data

Process connection

for screwing in: G 1/2 (1/2" pipe), G 3/4 (3/4" pipe)
for welding in: dia. 24H7, dia. 30H11

Sheath

Material:
steel 1.0305
stainless steel 1.4571
steel 1.7335
others on request

Operating temperature range

up to 450 °C, take note of loading diagrams!

Loading diagrams

Loading of sheaths

Form D according to 43763 Basic type 909712/50 and /51

Sheath: st. steel X6 CrNiMoTi 17 12 2,
 Material Ref. 1.4571

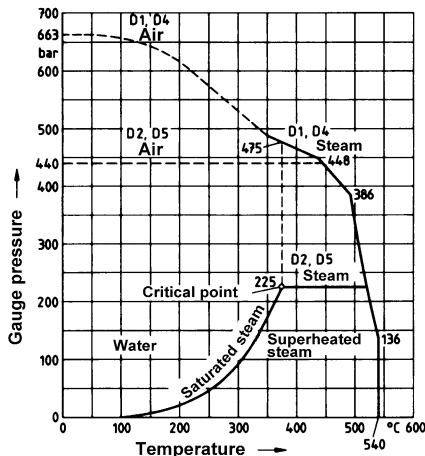

Sheaths D1 and D4:
 Permissible flow velocity for
 air, water, superhdt. steam: up to 60 m/sec

Sheaths D2 and D5:
 Permissible flow velocity
 for air: up to 60 m/sec
 for water, superheated steam: up to 30 m/sec

Load limits on sheaths, for various sheath dimensions

The diagram shows the load limits (guide values) for different sheath dimensions. The maximum pressure loading of cylindrical sheaths is shown in relation to the wall thickness with different sheath diameters. The data refer to sheaths in stainless steel 1.4571, fitting length 100 mm, flow velocity 10 m/sec in air or 4 m/sec in water and a temperature range from -20 to +100 °C. A safety factor of 1.8 has been taken into account. For higher temperatures, or different materials, the maximum pressure loading has to be reduced by the percentage values given in the table.

Material	Temperature	Reduction
CrNi 1.4571	up to +200 °C	-10 %
CrNi 1.4571	up to +300 °C	-20 %
CrNi 1.4571	up to +400 °C	-25 %
CrNi 1.4571	up to +500 °C	-30 %
CuZn 2.0401	up to +100 °C	-15 %
CuZn 2.0401	up to +175 °C	-60 %

Loading on sheaths

Form D according to 43763 Basic type 909712/50 and /51

Sheath: steel 13 CrMo 44,
 Material Ref. 1.7335

Permissible flow velocity for
 air and superheated steam: up to 60 m/sec

Loading in water: up to 450 bar
 and up to 5 m/sec
