BERNSTEIN clamping vices SPANNFIX constructed on ball-and-socket joints are rotatable easily in all directions and capable of being set securely with maximum working capacity by simple operation. A set screw below the ball socket allows an individual adjusting of the ball power. Long life is guaranteed by highest black powder-coated aluminum casting and surface-refined steel parts. With a surface resistance between $10^7$ and $10^8 \Omega$ the ESD types ensure a safe dissipation of static charges.
