

raaco ToolCase - more than just a tool case

Inside, the raaco ToolCase is equipped with gas struts that make it both safe and easy to open and close. The tool case also features tool panels - one or two detachable panels and one permanent panel. The detachable tool panels mounted in the lid open at a 30 degree angle for excellent visibility of tools and ease of access. The bottom tool panel stays horizontal when the ToolCase is opened, closing off the lowest compartment to keep contents in place.

raaco's tool panels are available in both single and double options and can be mixed and matched across the various product types: The tool panels with flexible Open ToolFix tool holders with bottom opening for easy access, while the tool panels with open, elasticised tool holders ensure durable elasticity and stretchability. Both types of tool panel offer an entirely new level of flexibility and overview that makes it possible to store many different types of tools safely and securely.

The base of the raaco ToolCase contains a practical tray for storing small items and accessories. The tray can be divided into several small compartments as needed with the help of raaco inserts or dividers.

The raaco ToolCase is available in three different qualities: Basic, Premium and Superior. Basic models are equipped with a solid aluminium frame while the Premium models feature double-frame construction for increased reinforcement and durability. The Superior model boasts a triple-frame construction for maximum reinforcement and durability. The Premium XL and Superior XL models come in a practical trolley version with noise reducing rubber wheels and 4-way telescopic handle for quiet, comfortable and secure transportation.

ToolCase Basic L - 48
