

# REVO PTS

The best quality/price ratio in a completely new lightweight robust case. Made in vacuum formed ABS and now with a strong aluminium trim, using the most advanced technological solutions and standardized automated production processes.

A system of special dividers is directly fitted into the ribbed bottom area, forming a more spacious and perfectly organized body. Without the addition of a separate internal bottom tray, the REVO PTS case is much lighter and just as resistant and compact.

## Model Description:

- 2 pallets with pouches
- Bottom tray with removable dividers
- 2 side locks with key
- Soft grip handle

Flexipouches™: patented system featuring elastic band on top of the pouch to ensure tools always in place
