Notes

1. The lead terminals are also used as faston terminals#187(Use a positive lock connector type).
2. The lead terminal type can be mounted onto a board. (Manual soldering required)
3. Right angle terminal in reverse direction is also available.
4. Standard products apply Grade V-2 material (Flame Class). For Grade V-0 type please contact us.
5. Products other than those listed in the above chart are also available. Please contact our us for details.
6. Please place purchase orders per minimum order unit(integer).

Notes

1. Dip soldering can be used on SDDJE For PC board terminal and SDDJF right angle terminal types only.
2. The operating temperature range for automotive applications can be raised upon request. Please contact us for requirements of this kind.
