

Datasheet

Non-Eurocard Prototyping Boards

RS Stock number 100-4154

Specification

Ideal for development and prototyping work, designed primarily for hard wiring of discrete components, typically in analogue circuits, but is equally useful where a number of common bus or signal lines are required.

Manufactured from copper clad laminated board which has been pierced with a grid of holes and machined to provide parallel tracks.

Features

- Ideal for hard wiring or discrete components
- Range of standard sizes
- Choice of hole sizes and grid pitch
